

	Environmental Policy	PA. EST. 01 Version no.2 January/2022
---	----------------------	---

Belcinto is a company linked to the high-end leather goods industry. We work for 35 countries, always trying to do our best and produce leather goods with exceptional quality, as well as optimizing the management of environmental risks associated with the activity carried out.

We assume a commitment to responsibility and sustainability with the aim of minimizing environmental impact and seeking to improve our performance. In this light, we working to achieve ISO 14001 certification, since environmental management and, consequently, the protection of planet Earth is, for us, an imperative. Este compromisso com a sustentabilidade assenta nos seguintes princípios:

- Adopting sustainability criteria in the selection of materials and suppliers;
- Adopting the principle of pollution prevention, implementing practices that allow the control of adverse environmental impacts, namely:
 - Minimize the production of waste and ensure its proper forwarding;
 - Avoid the use of chemicals with dangerous characteristics, promoting their elimination or replacement, whenever possible;
- Pursue good environmental practices, making our employees aware and making them agents for sustainability;
- Promote the continuous improvement of the environmental management system;
- Influence other stakeholders to act consciously and actively for the environment;
- Adopt, as basic premises, the compliance of the applicable environmental legislation, the REACH Regulation and the CALIFORNIA Proposal 65.

The Administration,
